

WEBSITE PLAN & CONTENT ARCHITECTURE

Kasliwal Joint Institute

PRECISION. COMPASSION. MOTION.

Sitemap · page-by-page content · homepage design brief · SEO & migration plan

Client: Dr. Vishal Kasliwal, M.S. Orthopaedics · Nashik, Maharashtra

Prepared October 2026 · Working draft for client review

INSIDE THIS DOCUMENT

Contents

#	Section	Covers
1	Project summary & positioning	Rebrand, goals, what the research showed
2	Brand & visual identity	Tagline, colours, type, imagery, tone of voice
3	Website sitemap	Every page we keep, with URLs and navigation
4	Homepage, section by section	Mapped to the client's demo landing page
5	Robotic Joint Replacement pages	Hub, Robotic TKR, Robotic UKR, Robotic THR, VELYS
6	Knee pages	Knee hub, knee arthritis, arthroscopy, ACL, meniscus, PCL/cartilage
7	Hip pages	Hip hub, AVN of hip
8	Shoulder, revision & complete orthopaedic care	Supporting service pages
9	About, philosophy & hospital	Dr. Vishal Kasliwal, surgical philosophy, hospital
10	Patient Guide	Journey, do I need surgery, recovery, cost, FAQs, outstation patients
11	Knowledge Centre	Structure, article template, 65+ planned articles
12	Stories, contact & utility pages	Testimonials, booking, legal, 404
13	Technical SEO, local SEO & migration	Fixes for the current ranking problems
14	Compliance & content governance	Claims, consent, medical review
15	Inputs needed from the client & roadmap	Checklist and phased timeline

SECTION 1

Project summary & positioning

Dr. Vishal Kasliwal's orthopaedic practice is being rebranded as **Kasliwal Joint Institute**, with the tagline **Precision. Compassion. Motion.** This document sets out the new website: which pages it will have, what goes on each page, how the homepage follows the client's demo design, and the technical work needed so the site finally becomes visible on Google.

Positioning

> "When you need joint replacement, you want the right operation, performed by an experienced specialist, using technology that allows precision and personalised planning."

The site leads with **precision joint replacement**, not with the robot. VELYS™ is the technology. The reasons to trust it are Dr. Kasliwal's 15+ years of practice, his fellowship training, his surgical philosophy, and patient outcomes. Every page should reinforce this order: surgeon's judgement first, technology second.

Core differentiator line

Robotic precision. Personalised alignment. Experienced surgical judgement.

Website goals

- **Rank in Nashik and North Maharashtra** for robotic knee replacement, partial knee replacement, hip replacement and joint replacement searches.
- **Turn visitors into consultations** through clear Book / Call / WhatsApp actions on every page.
- **Educate anxious patients and families** so they arrive informed and confident, which also builds organic traffic.
- **Build one clear online identity** linking Dr. Vishal Kasliwal → Kasliwal Joint Institute → Kasliwal Super Speciality Hospital → Nashik → Joint Replacement.

Five content pillars

Pillar	Role on the site
01 Robotic Joint Replacement	The flagship. Highest-value pages and most internal links.
02 Dr. Vishal Kasliwal	The surgeon behind the technology. Trust and authority (E-E-A-T).
03 Kasliwal Joint Institute	The specialist centre, with the hospital as its home.
04 Patient Education	Patient Guide and Knowledge Centre. The largest organic-search opportunity.
05 Complete Orthopaedic Care	Arthroscopy, revision and trauma. Supporting, not competing with, the joint replacement identity.

What our research found (why the current site doesn't rank)

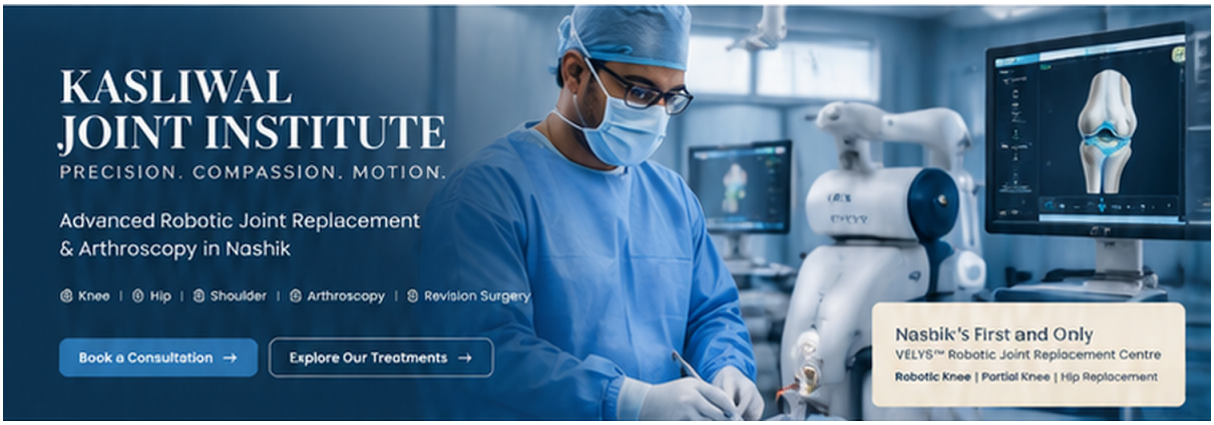

Finding	Impact	Fix in this plan
robotickneeandhip.in was registered on 27 May 2026 (about 4 months old).	New domains with few backlinks rarely rank for competitive terms.	Domain decision and authority-building (Section 13).

Finding	Impact	Fix in this plan
The site did not appear even when searching its own domain name, and it blocks automated crawlers.	Possible indexing / robots problem.	Search Console, robots.txt and noindex audit before launch.
The doctor's presence is split across 4 sites: kasliwalhospital.in, drvishalkasliwal.kasliwalhospital.in, kasliwalhospital.com and robotickneeandhip.in.	The sites compete with each other and split authority.	One primary site, with 301 redirects and clear roles.
Inconsistent details online: 8 / 10 / 15 / 21 years' experience; 3,000 vs 5,000 surgeries; old Juna Agra Road address; two phone numbers.	Weakens local SEO and patient trust.	One verified fact sheet, then a NAP clean-up across all directories.
Strong reputation: about 4.7 across 300+ ratings on Justdial and other directories.	A big asset that the current site doesn't use.	Reviews strategy and Google Business Profile integration.

SECTION 2

Brand & visual identity

The visual language below is taken from the client's demo landing page: deep navy and clean white, warm sand accents, an elegant serif for headlines, and calm, clinical photography.

Reference: hero from the client's demo landing page.

Brand elements

Element	Specification
Name	Kasliwal Joint Institute (the hospital, Kasliwal Super Speciality Hospital, remains the parent facility)
Tagline	PRECISION. COMPASSION. MOTION. Set in small caps / tracked capitals under the logo.
Logo	Gold figure-in-motion mark + navy serif wordmark (as in demo). Provide SVG, horizontal and stacked lock-ups, plus a favicon.
Primary colours	Navy #0B2D52 (headers, dark panels, footer) · Clinical blue #1F5C99 (buttons, links, icons)
Secondary colours	Sand #F4EDE1 (trust bar, badges, soft panels) · Gold #B8873F (logo mark, small accents only) · Ice blue #E8F0F8 (section backgrounds)
Headline font	Elegant high-contrast serif, e.g. Playfair Display or Libre Caslon (demo style).
Body font	Clean humanist sans, e.g. Source Sans 3, Inter or Poppins. Body text 17–18px on desktop, 16px minimum on mobile.
Icons	Thin-line medical icons in clinical blue (as in trust bar and journey timeline).
Buttons	Primary: solid blue, white text, arrow →. Secondary: outlined. Rounded corners about 4px.
Photography	Real photos only for the doctor, OT, VELYS, hospital and patients. Use cool, bright tones. The demo's AI-generated images are placeholders and must be replaced.

Tone of voice

- **Calm, expert, reassuring.** Speak to the patient's problem first (pain, walking, stairs, sleep), then the solution.
- **Evidence-based, never hype.** Avoid “best”, “No. 1”, “100% success”, “painless” and “guaranteed”.
- **Plain language with the medical term in brackets**, e.g. “partial knee replacement (UKR)”.
- **Honest about suitability**, e.g. “Partial knee replacement is not automatically better than total knee replacement.”

Text in the demo image

The demo was produced with an AI image tool and contains spelling errors (e.g. “Shouldee instability”, “Breach Candy Hospitol”, “Read Dr. Kasiiwal's Story”). Use this document as the source of copy, not the image text.

SECTION 3

Website sitemap

The client's content tree (Robotic Surgery → TKR/UKR/THR; Knee → TKR/UKR/Arthroscopy → ACL/Meniscus/PCL-Cartilage; Hip → THR/AVN; Knowledge Centre → Knee/Hip/Robotics) has been turned into the page structure below.

Key structural decision: one page per procedure

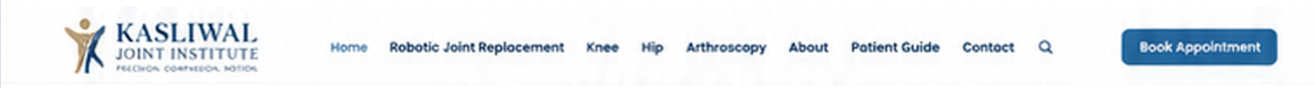

In the client's tree, TKR and UKR appear under both **Robotic Surgery** and **Knee**, and THR under both **Robotic** and **Hip**. Two pages on the same procedure would compete with each other on Google (keyword cannibalisation). So each procedure gets **one canonical page** (the robotic version). The Knee and Hip hubs link to it, and the menus show it in both places.

Mobile header

- Logo + hamburger + a compact “Book” button.
- A **sticky bottom bar on every page** with three actions: Call · WhatsApp · Book. Most patients in Nashik will browse on phones.

SECTION 4

Homepage, section by section

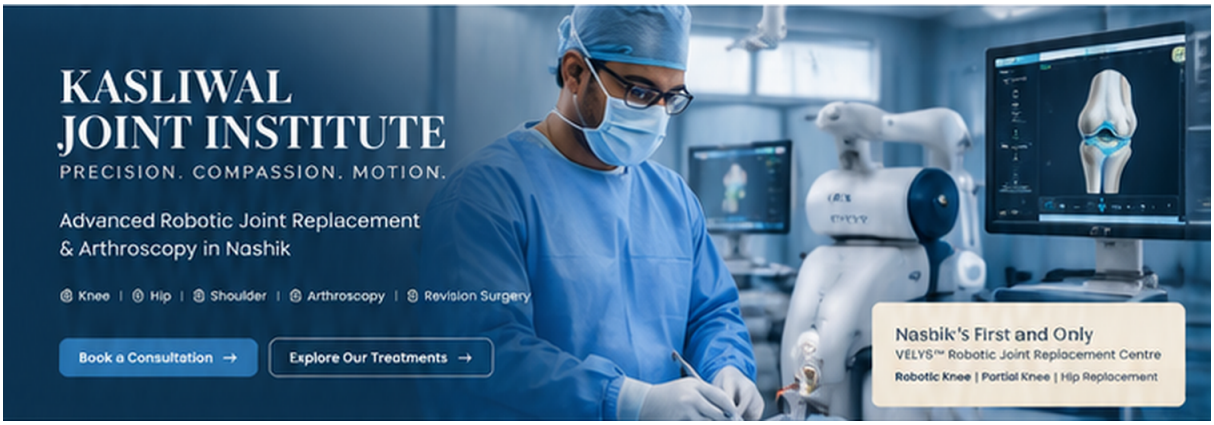

The homepage follows the client's demo layout from top to bottom. Each section below shows the reference crop, the final content, design notes, and anything to change or verify.

URL	/
H1	Advanced Robotic Joint Replacement & Arthroscopy in Nashik
Title tag	Robotic Knee & Hip Replacement in Nashik | Kasliwal Joint Institute
Meta description	Robotic knee, partial knee and hip replacement in Nashik with Dr. Vishal Kasliwal, fellowship-trained joint replacement surgeon. Book a consultation.
Target keywords	robotic knee replacement Nashik, joint replacement surgeon Nashik, knee replacement Nashik, hip replacement Nashik

SEO note on the hero heading

In the demo, the largest text is “KASLIWAL JOINT INSTITUTE”. Keep it visually, but code it as a styled brand line, not the H1. The H1 should be the service line (“Advanced Robotic Joint Replacement & Arthroscopy in Nashik”) so Google reads what the page is about.

4.1 Hero

- **Brand line:** KASLIWAL JOINT INSTITUTE + tagline PRECISION. COMPASSION. MOTION.
- **H1:** Advanced Robotic Joint Replacement & Arthroscopy in Nashik
- **Speciality chips:** Knee · Hip · Shoulder · Arthroscopy · Revision Surgery (each links to its page)
- **Buttons:** [Book a Consultation →] (primary) and [Explore Our Treatments →] (outlined)
- **Badge card (sand):** VELYS™ Robotic Joint Replacement Centre with Robotic Knee | Partial Knee | Hip Replacement links
- **Visual:** Real photograph of Dr. Kasliwal at the VELYS™ console or in theatre, with a navy gradient overlay on the left for text legibility

Verify before publishing

The demo badge says “Nashik's First and Only VELYS™ Robotic Joint Replacement Centre”. Use it only with written proof that it is currently true (e.g. confirmation from J&J; MedTech/DePuy Synthes). Until then, use “VELYS™ Robotic-Assisted Joint Replacement in Nashik”.

4.2 Trust bar

- Four stats with line icons, on a sand background: **15+** years of orthopaedic practice · **~5,000** orthopaedic & joint replacement procedures · **Fellowship-trained** in Joint Replacement & Arthroscopy · **Advanced Technology**: VELYS™ robotic & navigation-assisted surgery

Single source of truth

These numbers must match everywhere: the website, Google Business Profile, Justdial, Practo, Lybrate and ClinicSpots. Currently, directories show 8, 10, 15 and 21 years and both 3,000 and 5,000 surgeries. Get the final figures from Dr. Kasliwal in writing.

4.3 Expert care for every joint

- **Eyebrow / heading:** FIND THE RIGHT TREATMENT, “Expert care for every joint”
- **Intro:** From arthritis and joint replacement to sports injuries and trauma, we provide comprehensive orthopaedic care using advanced technology and personalised treatment.
- **Knee Care**: knee arthritis, total knee replacement, partial knee replacement, ACL/PCL & meniscus → /knee-specialist-nashik/
- **Hip Care**: hip arthritis, AVN of hip, hip replacement, revision hip surgery → /hip-specialist-nashik/
- **Shoulder Care**: rotator cuff repair, Bankart repair, shoulder instability, arthroscopy → /shoulder-arthroscopy-nashik/
- **Trauma Care**: fractures & emergencies, complex trauma, comprehensive treatment → /orthopaedic-trauma-care-nashik/

Shoulder replacement

The demo's shoulder card says “Arthroscopy & replacement”. Include shoulder replacement only if Dr. Kasliwal performs it regularly.

4.4 Flagship: Robotic Knee Replacement

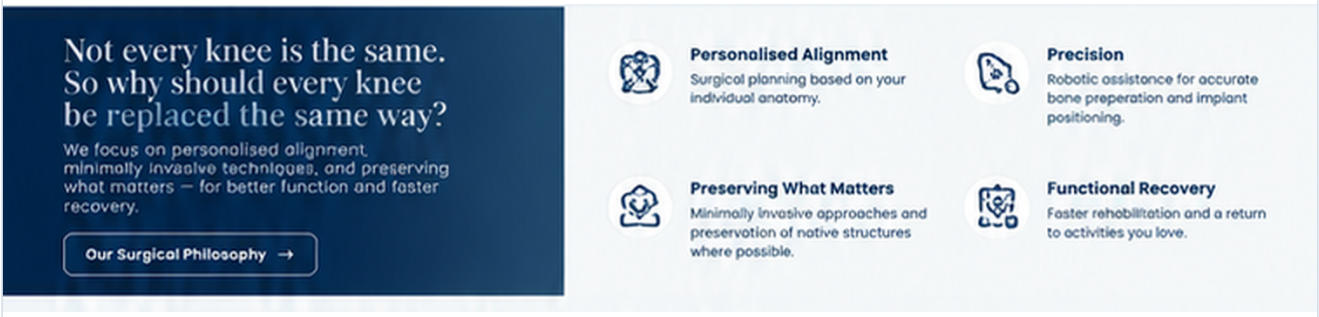

- **Eyebrow:** OUR FLAGSHIP SERVICE · **H2:** Robotic Knee Replacement · **Sub:** Precision planned around you.
- **Copy:** Robotic-assisted knee replacement combines advanced technology with the surgeon's experience to create a personalised plan based on your unique anatomy.
- Three cards with implant icons: **Robotic Total Knee Replacement** (advanced arthritis needing total replacement) · **Robotic Partial Knee Replacement** (arthritis in one compartment) · **Revision Knee Replacement** (complex or failed knee replacements)
- **Button:** [Explore Robotic Knee Replacement →]

Verify the revision card

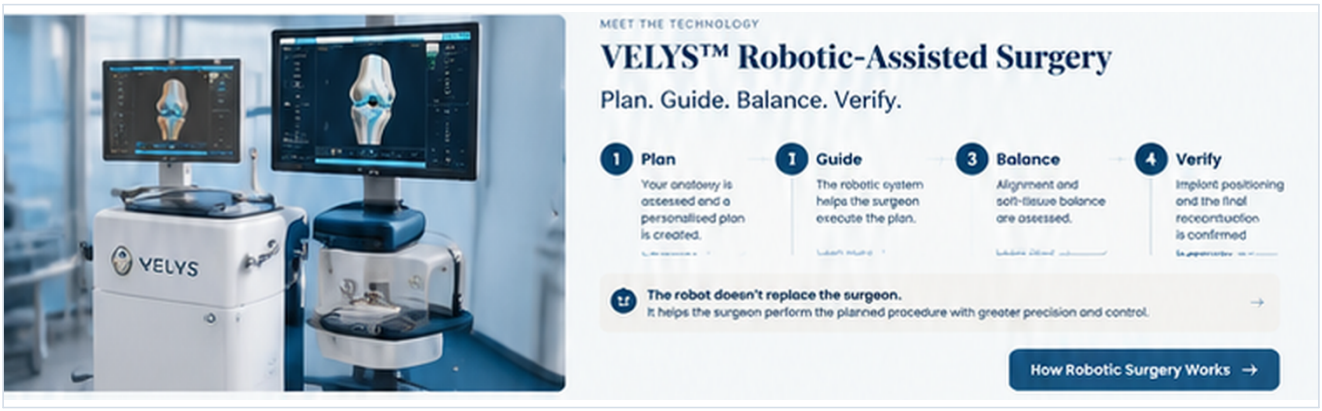

The demo labels the third card “Robotic Revision Knee Replacement”. Confirm whether robotic assistance is actually used for revisions at the institute. If not, label it “Revision Knee Replacement” to keep the claim accurate. Robotic Hip appears in the hero badge and Hip card, so it stays visible on the homepage.

4.5 Surgical philosophy

- **Left navy panel:** “Not every knee is the same. So why should every knee be replaced the same way?” + short text on personalised alignment, minimally invasive technique and preserving what matters + [Our Surgical Philosophy →]
- **Right, four features:** Personalised Alignment (planning based on individual anatomy) · Precision (robotic assistance for accurate bone preparation and implant positioning) · Preserving What Matters (minimally invasive approaches, e.g. subvastus; preservation of native structures where appropriate) · Functional Recovery (early rehabilitation and return to activities you love)

4.6 Meet the technology: VELYS™

- **H2:** VELYS™ Robotic-Assisted Surgery · **Sub:** Plan. Guide. Balance. Verify.
- Four numbered steps: **1 Plan** (anatomy assessed, personalised plan created) · **2 Guide** (robotic system helps the surgeon execute the plan) · **3 Balance** (alignment and soft-tissue balance assessed) · **4 Verify** (implant positioning and final reconstruction confirmed)
- **Highlight strip:** "The robot doesn't replace the surgeon. It helps the surgeon perform the planned procedure with greater precision and control."
- **Visual:** real photo of the institute's VELYS™ unit (not the demo render) · **Button:** [How Robotic Surgery Works →] → /velys-robotic-surgery/

> **Trademark**
> VELYS™ is a trademark of DePuy Synthes (Johnson & Johnson MedTech). Add an attribution line in the footer and do not use the manufacturer's logo without permission.

4.7 Meet the surgeon

- **Professional portrait** (navy scrubs, as in demo) · **H2:** Dr. Vishal Kasliwal · M.S. Orthopaedics · Fellowship-trained Joint Replacement & Arthroscopy Surgeon
- **Bio line:** Trained at Breach Candy Hospital, Mumbai under Dr. Arun Mullaji for joint replacement, with fellowship training in arthroscopy under Dr. Sachin Tapasvi, Pune, and advanced shoulder arthroscopy training under Dr. Jin Young Park, Korea.
- **Mini stats:** 15+ years · ~5,000 procedures · Joint Replacement (primary & revision) · Arthroscopy (knee & shoulder)
- **Button:** [Read Dr. Kasliwal's Story →]

Spelling to confirm
The client brief writes “Tapaswi” and public directories write “Tapasvi”. Confirm the preferred spelling.

4.8 Your surgery journey

- **H2:** From consultation to getting back to life · **Button:** [What to Expect After Surgery →]
- 10-step icon timeline: Consultation → Diagnosis & Assessment → Treatment Decision → Personalised Planning → Surgery → Early Mobilisation → Physiotherapy → Going Home → Follow-up → Back to Movement. Each step shows a one-line tooltip on hover/tap.
- **Mobile:** a vertical timeline or horizontal swipe.

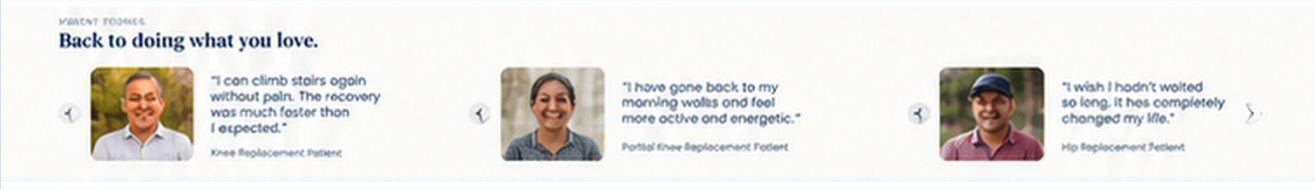

4.9 The hospital

- **Eyebrow:** COMPLETE CARE UNDER ONE ROOF · **H2:** Kasliwal Super Speciality Hospital
- **Copy:** A dedicated orthopaedic hospital with state-of-the-art operation theatres, a laminar airflow environment, a dedicated physiotherapy team and comprehensive perioperative care. [View Our Hospital →]
- **Feature list:** State-of-the-art OT · Laminar airflow · Dedicated physiotherapy · Experienced nursing team · Supporting medical specialists · Comprehensive care
- **Visual:** real exterior photograph of Bosco Centre, Gangapur Road

Verify
Confirm laminar airflow OT, ICU and cashless insurance availability before publishing.

4.10 Patient stories

- **Eyebrow:** PATIENT STORIES · **H2:** Back to doing what you love.
- Carousel of 3+ short quotes with photo, first name, procedure label (e.g. Knee Replacement Patient). Add a live Google rating badge and a link to /patient-stories/.
- Use real patients only, with written consent. Video testimonials (Marathi/Hindi with subtitles) are especially effective.

4.11 Knowledge Centre preview

- **Eyebrow:** KNOWLEDGE CENTRE · **H2:** Questions patients ask us every day · [View All Articles →]
- Six article cards: When should I consider knee replacement? · Am I too young for knee replacement? · What is robotic knee replacement? · Total vs partial knee replacement · How long does a knee replacement last? · When can I walk after surgery?

4.12 Closing call to action

- **Navy band:** “Ready to take the next step?” + “Whether you're exploring treatment options or already considering joint replacement, the first step is understanding what's right for you.”
- Three buttons: [Book an Appointment →] · [Call Us] · [WhatsApp]

4.13 Footer

- Logo + tagline · Quick Links · Patient Information · Hospital NAP block (name, full address, phone, email, OPD timings, Google Maps link)
- Social icons (YouTube, Instagram, Facebook, LinkedIn, Google) · Privacy Policy · Terms · Medical Disclaimer · VELYS™ trademark line · auto-updating © year (the demo shows 2024)

SECTION 5

Robotic Joint Replacement pages

These are the flagship SEO pages. Each procedure page should eventually be 2,500–4,000 words of genuinely useful, medically reviewed content. Long pages use a sticky table of contents, short sections, diagrams and an FAQ accordion.

Standard inner-page template (all service pages)

- Breadcrumb → page hero (H1, one-line promise, Book/Call buttons, real photo) → sticky table of contents (desktop).
- Content sections → mid-page CTA band → FAQs (accordion + FAQPage schema) → "Medically reviewed by Dr. Vishal Kasliwal, M.S. Ortho · Last updated [date]".
- Related procedures and articles → closing CTA → footer. Every page links back to its hub and to the surgeon page.

5.1 Robotic Joint Replacement (hub)

URL	/robotic-joint-replacement-nashik/
H1	Robotic Joint Replacement in Nashik
Title tag	Robotic Joint Replacement in Nashik | VELYS™ | Kasliwal Joint Institute
Meta description	Robotic-assisted knee, partial knee and hip replacement in Nashik. Personalised planning and experienced surgical judgement with Dr. Vishal Kasliwal.
Target keywords	robotic joint replacement Nashik, robotic surgery Nashik, VELYS Nashik
Length / type	Hub, 1,200–1,800 words

Page content, in order

#	Section	What it contains
1	Hero	H1, positioning line, Book/Call buttons, photo of the VELYS™ unit in the institute's OT.
2	Precision joint replacement	Philosophy paragraph: replacing a joint means understanding anatomy, lifestyle, expectations and disease.
3	Three procedure cards	Robotic TKR · Robotic Partial Knee · Robotic Hip, each with a 2-line summary and link.
4	What "robotic" really means	Short version of Plan → Guide → Balance → Verify with a link to the VELYS page.
5	The robot doesn't replace the surgeon	The surgeon remains responsible for diagnosis, decision-making, planning and execution.
6	Who is it for?	Candidacy overview; robotic assistance isn't a different operation, it's a more precise way of doing it.
7	Why Kasliwal Joint Institute	Six points: 15+ years · ~5,000 procedures · fellowship training · VELYS™ technology · personalised planning · dedicated rehab team.
8	Journey snapshot + CTA	Mini timeline and a link to Patient Guide; Book / Call / WhatsApp.
9	FAQs	6–8 questions, e.g. Is robotic surgery safe? Is it more expensive? Does insurance cover it?

5.2 Robotic Total Knee Replacement (TKR)

URL	/robotic-knee-replacement-nashik/
H1	Robotic Knee Replacement in Nashik
Title tag	Robotic Knee Replacement in Nashik | Dr. Vishal Kasliwal
Meta description	VELYS™ robotic-assisted total knee replacement in Nashik: who it's for, how it works, recovery, risks and cost. Consult Dr. Vishal Kasliwal.
Target keywords	robotic knee replacement Nashik (primary), robotic knee replacement surgeon Nashik, total knee replacement Nashik, knee replacement surgeon Nashik
Length / type	Flagship, 2,500–4,000 words

Page content, in order

#	Section	What it contains
1	Hero	H1, promise line, buttons, surgeon + robot photo.
2	What is knee arthritis?	Osteoarthritis, rheumatoid and post-traumatic arthritis; bow-leg/knock-knee deformity (common in Indian patients).
3	When does it need surgery?	Symptoms, function, examination and imaging, not the X-ray alone. Link to “Do I need a knee replacement?”.
4	What is total knee replacement?	Simple diagram of resurfacing the femur, tibia and (optionally) patella.
5	What is robotic-assisted TKR?	Definition plus the surgeon's role.
6	How it works, step by step	1 Clinical assessment · 2 Imaging & planning · 3 Personalised surgical plan · 4 Robotic-assisted bone preparation · 5 Implant positioning & balancing · 6 Recovery & rehabilitation.
7	Robotic vs conventional TKR	Evidence-based comparison table with citations to published studies; no marketing claims.
8	Who is a candidate / who may not need robotics	Honest suitability section.
9	Recovery timeline	Day 1 walking with support, hospital stay, stairs, driving, work, squatting and sitting cross-legged (Indian lifestyle), as general ranges only.
10	Risks and complications	Infection, clots, stiffness, etc., and how they are minimised.
11	Cost and insurance	Summary plus a link to the Cost page.
12	Patient story	One consented testimonial or video.
13	FAQs + CTA	8–12 FAQs; “Could knee replacement be right for you?” → Book consultation.

5.3 Robotic Partial Knee Replacement (UKR)

URL	/robotic-partial-knee-replacement-nashik/
H1	Robotic Partial Knee Replacement in Nashik
Title tag	Robotic Partial Knee Replacement in Nashik | Kasliwal Joint Institute
Meta description	Not every arthritic knee needs a total replacement. Learn who suits robotic partial knee replacement (UKR) in Nashik and how it compares to TKR.
Target keywords	partial knee replacement Nashik, robotic partial knee replacement Nashik, unicompartmental knee replacement, UKR Nashik
Length / type	Flagship, 2,500–3,500 words

Page content, in order

#	Section	What it contains
1	Opening statement	“Not every arthritic knee needs a total knee replacement.”
2	What is partial knee replacement?	Replacing only the damaged compartment.
3	Who is suitable?	Medial or lateral compartment arthritis, patellofemoral disease, ligament status, deformity, range of motion, age/activity, isolated vs multicompartment disease.
4	Partial vs Total comparison table	Diseased compartments · Bone preservation · Ligaments · Candidate selection · Recovery · Robotic assistance.
5	Credibility line	“Partial knee replacement is not automatically better than total knee replacement. The right operation depends on the pattern of arthritis and the individual patient.”
6	How robotics helps UKR	Precision matters more in a smaller implant.
7	Recovery, risks, longevity	Including whether a partial can later be converted to a total.
8	FAQs + CTA	Ask whether you are a candidate → Book.

5.4 Robotic Hip Replacement (THR)

URL	/robotic-hip-replacement-nashik/
H1	Robotic Hip Replacement in Nashik
Title tag	Robotic Hip Replacement in Nashik | Dr. Vishal Kasliwal
Meta description	Navigation and robotic-assisted total hip replacement in Nashik for hip arthritis and AVN. Planning, leg length, recovery and FAQs.
Target keywords	hip replacement Nashik, robotic hip replacement Nashik, hip replacement surgeon Nashik, total hip replacement Nashik
Length / type	Flagship, 2,500–3,500 words

Page content, in order

#	Section	What it contains
1	What is hip arthritis?	Causes and symptoms (groin pain, limp, difficulty with shoes and socks).
2	When is hip replacement required?	Arthritis, AVN, fractures and other indications; link to the AVN page.
3	What is robotic / navigation-assisted THR?	How technology helps cup position, leg length and offset.
4	Planning & implant positioning	Leg length considerations and hip stability.
5	Recovery	Walking, stairs, sleeping, driving, returning to work, sitting on the floor.
6	Risks	Dislocation, leg-length difference, infection, clots.
7	FAQs + CTA	FAQ accordion (with FAQPage schema), then Book / Call / WhatsApp buttons

Describe the hip technology accurately

Confirm exactly what is used for hips (e.g. VELYS™ Hip Navigation vs a robotic arm). If it is navigation, say “navigation-assisted” in the body copy even if the page is titled for search as “Robotic Hip Replacement”.

5.5 How VELYS™ Robotic Surgery Works

URL	/velys-robotic-surgery/
H1	How VELYS™ Robotic-Assisted Knee Replacement Works
Title tag	VELYS™ Robotic Knee Surgery Explained | Kasliwal Joint Institute
Meta description	Plan, guide, balance, verify: a clear explanation of how VELYS™ robotic-assisted knee replacement works, and why the surgeon stays in control.
Target keywords	VELYS robotic knee replacement, VELYS Nashik, how robotic knee surgery works
Length / type	Explainer, 1,500–2,000 words + video

Page content, in order

#	Section	What it contains
1	Plan · Guide · Balance · Verify	Illustrated four-step explainer (the demo's VELYS section, expanded).
2	How the anatomy is assessed	Intraoperative data collection, explained simply.
3	How bone preparation is controlled	The robot assists; it does not operate on its own.
4	Soft-tissue balancing	Why ligament balance matters for a natural-feeling knee.
5	The robot doesn't replace the surgeon	Dedicated trust section.
6	Video	Short walkthrough by Dr. Kasliwal in the OT (Marathi + English subtitles).
7	Myths vs facts + CTA	FAQ accordion (with FAQPage schema), then Book / Call / WhatsApp buttons

SECTION 6

Knee pages

The Knee hub is the doorway for everyone with knee pain, whether they need injections, arthroscopy or a replacement. It routes visitors to the right procedure page.

6.1 Knee Care (hub)

URL	/knee-specialist-nashik/
H1	Knee Specialist in Nashik
Title tag	Knee Specialist in Nashik | Arthritis, Arthroscopy & Replacement
Meta description	Knee pain, arthritis, ligament and meniscus injuries, and knee replacement in Nashik. Expert assessment by Dr. Vishal Kasliwal.
Target keywords	knee specialist Nashik, knee pain doctor Nashik, knee surgeon Nashik
Length / type	Hub, 1,200–1,500 words

Page content, in order

#	Section	What it contains
1	Common knee problems	Grid: arthritis, ACL tear, meniscus tear, cartilage damage, kneecap instability, failed knee replacement.
2	Our approach: non-surgical first	Physiotherapy, weight, medication, injections; surgery only when appropriate.
3	Knee procedures	Cards linking to Robotic TKR, Partial Knee, Knee Arthroscopy, ACL, Meniscus, PCL & Cartilage, Revision.
4	Self-check	Link to “Do I need a knee replacement?”.
5	Latest knee articles + FAQs + CTA	FAQ accordion (with FAQPage schema), then Book / Call / WhatsApp buttons

6.2 Knee Arthritis Treatment

URL	/knee-arthritis-treatment-nashik/
H1	Knee Arthritis Treatment in Nashik
Title tag	Knee Arthritis Treatment in Nashik | Kasliwal Joint Institute
Meta description	Symptoms, stages and treatment options for knee arthritis, from exercise and injections to partial or total knee replacement.
Target keywords	knee arthritis treatment Nashik, knee osteoarthritis treatment
Length / type	Condition page, 1,500–2,500 words

Page content, in order

#	Section	What it contains
1	What is knee arthritis?	Types and stages (with X-ray grade illustrations).
2	Symptoms	Pain, stiffness, swelling, deformity, difficulty with stairs and squatting.
3	Treatment ladder	Lifestyle → physiotherapy → medicines → injections → partial knee → total knee.
4	When to see a surgeon + FAQs + CTA	FAQ accordion (with FAQPage schema), then Book / Call / WhatsApp buttons

6.3 Knee Arthroscopy (hub)

URL	/knee-arthroscopy-nashik/
H1	Knee Arthroscopy in Nashik
Title tag	Knee Arthroscopy in Nashik | ACL, Meniscus & Cartilage Surgery
Meta description	Keyhole (arthroscopic) knee surgery in Nashik for ACL tears, meniscus tears, PCL and cartilage injuries, and sports injuries.
Target keywords	knee arthroscopy Nashik, sports injury doctor Nashik
Length / type	Hub, 1,200–1,800 words

Page content, in order

#	Section	What it contains
1	What is arthroscopy?	Keyhole surgery explained with a diagram.
2	Conditions treated	Cards to ACL, Meniscus, PCL & Cartilage, plus patellar instability.
3	Sports injuries	Return-to-sport philosophy.
4	Recovery overview + FAQs + CTA	FAQ accordion (with FAQPage schema), then Book / Call / WhatsApp buttons

6.4 ACL Reconstruction

URL	/acl-reconstruction-nashik/
H1	ACL Reconstruction Surgery in Nashik
Title tag	ACL Reconstruction Surgery in Nashik | Dr. Vishal Kasliwal
Meta description	Expert arthroscopic treatment in Nashik: acl reconstruction surgery, causes, surgery options and recovery.
Target keywords	ACL surgery Nashik, ACL tear treatment Nashik, ACL reconstruction
Length / type	Procedure page, 1,500–2,500 words

Page content, in order

#	Section	What it contains
1	What is the ACL & how it tears	Standard block from the inner-page template
2	Symptoms & diagnosis	MRI and clinical tests.
3	Surgery vs rehab	Who needs surgery.
4	Graft options & procedure	Hamstring, patellar tendon and other grafts; keyhole technique.
5	Recovery & return to sport	Phase-by-phase timeline.
6	FAQs + CTA	FAQ accordion (with FAQPage schema), then Book / Call / WhatsApp buttons

6.5 Meniscus Tear Treatment

URL	/meniscus-tear-treatment-nashik/
H1	Meniscus Tear Treatment in Nashik
Title tag	Meniscus Tear Treatment in Nashik | Dr. Vishal Kasliwal
Meta description	Expert arthroscopic treatment in Nashik: meniscus tear treatment, causes, surgery options and recovery.
Target keywords	meniscus tear treatment Nashik, meniscus repair, meniscal root repair
Length / type	Procedure page, 1,500–2,500 words

Page content, in order

#	Section	What it contains
1	What is the meniscus?	The knee's shock absorber, with a diagram.
2	Types of tear	Including meniscal root tears.
3	Repair vs trimming	Why preserving the meniscus matters.
4	Recovery	Weight-bearing and return-to-activity timeline for repair vs trimming.
5	FAQs + CTA	FAQ accordion (with FAQPage schema), then Book / Call / WhatsApp buttons

6.6 PCL & Cartilage Surgery

URL	/pcl-cartilage-surgery-nashik/
H1	PCL & Cartilage Surgery in Nashik
Title tag	PCL & Cartilage Surgery in Nashik | Dr. Vishal Kasliwal
Meta description	Expert arthroscopic treatment in Nashik: pcl & cartilage surgery, causes, surgery options and recovery.
Target keywords	PCL injury treatment, knee cartilage repair Nashik
Length / type	Procedure page, 1,500–2,500 words

Page content, in order

#	Section	What it contains
1	PCL injuries	Causes, diagnosis, treatment.
2	Cartilage damage	Options by size and location.
3	Patellar instability	Kneecap dislocation.
4	Recovery + FAQs + CTA	FAQ accordion (with FAQPage schema), then Book / Call / WhatsApp buttons

SECTION 7

Hip pages

THR lives on the Robotic Hip Replacement page (5.4). The Hip hub routes visitors to it and to the AVN page.

7.1 Hip Care (hub)

URL	/hip-specialist-nashik/
H1	Hip Specialist in Nashik
Title tag	Hip Specialist in Nashik | Hip Replacement & AVN Treatment
Meta description	Hip pain, arthritis, AVN and hip replacement in Nashik. Assessment and treatment by Dr. Vishal Kasliwal.
Target keywords	hip specialist Nashik, hip pain doctor Nashik
Length / type	Hub, 1,000–1,500 words

Page content, in order

#	Section	What it contains
1	Common hip problems	Arthritis, AVN, fracture, failed hip replacement.
2	Is it the hip or the back?	A short guide to where the pain comes from.
3	Hip procedures	Robotic Hip Replacement · AVN treatment · Revision Hip.
4	Articles + FAQs + CTA	FAQ accordion (with FAQPage schema), then Book / Call / WhatsApp buttons

7.2 Avascular Necrosis (AVN) of the Hip

URL	/avn-hip-treatment-nashik/
H1	AVN of the Hip: Treatment in Nashik
Title tag	AVN Hip Treatment in Nashik | Avascular Necrosis | Kasliwal Joint Institute
Meta description	Avascular necrosis of the hip: causes, early signs, stages and treatment, from joint-preserving options to hip replacement.
Target keywords	AVN hip treatment Nashik, avascular necrosis hip, AVN hip replacement
Length / type	Condition page, 1,800–2,500 words

Page content, in order

#	Section	What it contains
1	What is AVN?	Loss of blood supply to the femoral head; often affects younger adults.
2	Causes & risk factors	Steroids, alcohol, trauma, others.
3	Stages	Why early diagnosis (MRI) matters.
4	Treatment by stage	Joint-preserving options → hip replacement.
5	Young patients & hip replacement	Implant longevity and activity.
6	FAQs + CTA	FAQ accordion (with FAQPage schema), then Book / Call / WhatsApp buttons

SECTION 8

Shoulder, revision & complete orthopaedic care

8.1 Shoulder Arthroscopy

URL	/shoulder-arthroscopy-nashik/
H1	Shoulder Arthroscopy in Nashik
Title tag	Shoulder Arthroscopy in Nashik | Rotator Cuff & Instability Surgery
Meta description	Keyhole shoulder surgery in Nashik for rotator cuff tears, shoulder dislocation (Bankart), labral tears, impingement and frozen shoulder.
Target keywords	shoulder arthroscopy Nashik, rotator cuff repair Nashik, shoulder dislocation surgery
Length / type	Procedure page, 1,500–2,500 words

Page content, in order

#	Section	What it contains
1	Shoulder problems treated	Rotator cuff tears · instability/Bankart · labral pathology · impingement · frozen shoulder · revision shoulder surgery.
2	Training	Advanced shoulder arthroscopy training in Korea (Dr. Jin Young Park).
3	Procedure & recovery	Sling period, physiotherapy phases.
4	FAQs + CTA	FAQ accordion (with FAQPage schema), then Book / Call / WhatsApp buttons

Phase 2

If shoulder volume grows, split into separate Rotator Cuff and Shoulder Instability pages.

8.2 Revision Joint Replacement

URL	/revision-joint-replacement-nashik/
H1	Revision Knee & Hip Replacement in Nashik
Title tag	Revision Knee & Hip Replacement in Nashik | Kasliwal Joint Institute
Meta description	Specialist assessment and revision surgery for failed, painful, loose or infected knee and hip replacements in Nashik.
Target keywords	revision knee replacement Nashik, revision hip replacement, failed knee replacement
Length / type	Specialist page, 2,000–3,000 words

Page content, in order

#	Section	What it contains
1	Why does a joint replacement fail?	Infection, loosening, instability, polyethylene wear, periprosthetic fracture, stiffness, recurrent dislocation, implant failure, bone loss.
2	Warning signs	When to get your replacement checked.
3	How revision differs from primary surgery	Planning, special implants, bone loss management.
4	Complex revision surgery	What is involved.
5	Why specialist assessment matters	Positions the institute as a referral (tertiary) centre.
6	Second-opinion CTA + FAQs	Allow upload of X-rays/reports via the booking form.

8.3 Complete Orthopaedic Care (Trauma)

URL	/orthopaedic-trauma-care-nashik/
H1	Orthopaedic Trauma & Fracture Care in Nashik
Title tag	Fracture & Trauma Care in Nashik | Kasliwal Super Speciality Hospital
Meta description	Comprehensive orthopaedic trauma, fracture and emergency surgical care at Kasliwal Super Speciality Hospital, Nashik.
Target keywords	fracture treatment Nashik, orthopaedic emergency Nashik
Length / type	Single concise page, 800–1,200 words

Page content, in order

#	Section	What it contains
1	Emergency banner	Emergency phone number, prominent (click-to-call).
2	Services	Fractures, complex polytrauma, hip fractures in the elderly, dedicated ICU support.
3	Hip fracture in the elderly	Links to the hip replacement page.
4	CTA	FAQ accordion (with FAQPage schema), then Book / Call / WhatsApp buttons

Keep trauma small on purpose

One page only. Dozens of trauma pages would make Google see a generic orthopaedic hospital rather than a specialist joint replacement centre. SEO priority order: Knee → Hip → Robotic → Joint Replacement → Dr. Kasliwal.

SECTION 9

About, philosophy & hospital

9.1 About Dr. Vishal Kasliwal

URL	/dr-vishal-kasliwal/
H1	Dr. Vishal Kasliwal: Joint Replacement & Arthroscopy Surgeon, Nashik
Title tag	Dr. Vishal Kasliwal | Robotic Joint Replacement Surgeon in Nashik
Meta description	Meet Dr. Vishal Kasliwal, M.S. Ortho, fellowship-trained joint replacement and arthroscopy surgeon leading Kasliwal Joint Institute, Nashik.
Target keywords	Dr Vishal Kasliwal, Vishal Kasliwal orthopaedic surgeon, joint replacement surgeon Nashik
Length / type	Profile page, 1,500–2,000 words

Page content, in order

#	Section	What it contains
1	Hero	Large portrait, name, designation, 3 stats, Book button.
2	His story	Why joint replacement; the family legacy of Kasliwal Hospital (est. 1981); returning to Nashik.
3	Education & training timeline	MBBS (Mahadevappa Rampure Medical College) · M.S. Orthopaedics (JNMC, Belgaum) · Joint replacement fellowship, Breach Candy Hospital, Mumbai (Dr. Arun Mullaji) · Knee & shoulder arthroscopy fellowship, Pune (Dr. Sachin Tapasvi) · Shoulder arthroscopy, Korea (Dr. Jin Young Park).
4	Career	Registrar, YCM Hospital · Senior Registrar, KEM · Consultant, Mewar Group of Orthopaedic Hospitals · Lecturer, NDMVP Medical College (to be confirmed by the doctor).
5	Areas of expertise	Robotic TKR, partial knee, hip replacement, revision, knee & shoulder arthroscopy.
6	Surgical philosophy summary	Link to /surgical-philosophy/.
7	Memberships, conferences, publications, teaching	To be supplied by the client.
8	Registration	Medical council registration number (as required by professional norms).
9	Media, talks & video introduction	1–2 minute video of Dr. Kasliwal speaking to patients.
10	Patient reviews + CTA	FAQ accordion (with FAQPage schema), then Book / Call / WhatsApp buttons

This page powers the Physician schema

Mark it up as Physician (name, credentials, medicalSpecialty, affiliation → hospital, sameAs → directory profiles), so Google connects all of Dr. Kasliwal's profiles to this website.

9.2 Our Surgical Philosophy

URL	/surgical-philosophy/
H1	Our Surgical Philosophy: Personalised, Not Standardised
Title tag	Personalised Knee Replacement Philosophy | Kasliwal Joint Institute
Meta description	Every knee is different. Personalised alignment, minimally invasive technique, preserving native structures and robotic precision at Kasliwal Joint Institute.
Target keywords	personalised knee replacement, functional alignment knee replacement, subvastus approach
Length / type	Signature page, 1,200–1,800 words

Page content, in order

#	Section	What it contains
1	Replacement should be personalised, not standardised	Every knee is different. Every patient is different.
2	Functional / personalised alignment	Planning around each patient's anatomy and functional needs rather than one fixed target.
3	Minimally invasive philosophy	e.g. the subvastus approach, where appropriate, to minimise disruption to the extensor mechanism.
4	Cruciate-retaining philosophy	Preserving the PCL when clinically appropriate.
5	Precision	How robotics translates the plan into precise bone preparation and implant positioning.
6	Rehabilitation	Early mobilisation and functional recovery.
7	Closing	Experience + technology + personalisation.

9.3 Kasliwal Super Speciality Hospital

URL	/hospital/
H1	Kasliwal Super Speciality Hospital, Nashik
Title tag	Kasliwal Super Speciality Hospital, Gangapur Road, Nashik
Meta description	Home of Kasliwal Joint Institute: modular OTs, robotic surgery, physiotherapy and inpatient care on Gangapur Road, Nashik.
Target keywords	orthopaedic hospital Nashik, Kasliwal Hospital Nashik
Length / type	Facility page, 800–1,200 words + gallery

Page content, in order

#	Section	What it contains
1	Legacy	Kasliwal Hospital, est. 1981; the Gangapur Road super speciality unit.
2	Facilities	OTs, laminar airflow, VELYS™, ICU, wards/rooms, physiotherapy, diagnostics (verify each).
3	The team	Anaesthesia, physiotherapists, nursing; photos and names.
4	Photo gallery / virtual tour	Real photos of OT, VELYS™, rooms, physiotherapy area and reception.
5	Insurance & TPAs	Cashless list (link to Cost page).
6	Location	Map, directions, landmarks (Prasad Circle, Bosco Centre), parking.

SECTION 10

Patient Guide

These pages answer the questions families ask before deciding on surgery. They build trust, reduce anxiety and capture high-intent searches.

10.1 Patient Guide (hub)

URL	/patient-guide/
H1	Patient Guide
Length / type	Hub

Section	Content
Card grid	Journey, Do I need surgery?, Preparing, Recovery, Cost, Outstation, FAQs, Knowledge Centre.
Downloads	Printable pre-op checklist and exercise sheet (PDF).

10.2 Your Surgery Journey

URL	/patient-guide/surgery-journey/
H1	Your Journey to Better Movement
Length / type	1,500 words, visual timeline

Section	Content
10 steps	01 First consultation · 02 Understanding your joint · 03 Choosing the right treatment · 04 Planning your surgery · 05 Robotic-assisted procedure · 06 Early mobilisation · 07 Physiotherapy · 08 Going home · 09 Follow-up · 10 Returning to life.
For each step	What happens, who you meet, how long it takes, what to bring.
Goal	Certainty about what happens next.

10.3 Do I Need a Knee Replacement?

URL	/do-i-need-knee-replacement/
H1	Do I Need a Knee Replacement?
Length / type	1,500–2,000 words + interactive self-check

Section	Content
Self-check questions	Is my arthritis severe enough? Have I tried non-operative treatment? Does pain affect sleep? Can I walk normally? Climb stairs? Does my knee limit work or social life? Am I relying on painkillers? Have injections stopped helping? Is my quality of life declining?
Interactive tool	Tick-box quiz → result suggests “Discuss with a specialist” (never a diagnosis).
Key message	The decision is based on symptoms, function, examination and imaging, not simply an X-ray.
CTA	Book an assessment.

10.4 Preparing for Surgery

URL	/patient-guide/preparing-for-surgery/
H1	Preparing for Joint Replacement Surgery
Length / type	1,200 words + checklist

Section	Content
Medical preparation	Tests, diabetes/BP control, medicines to stop.
Home preparation	Western toilet/commode, rails, removing rugs, a firm chair, ground-floor bedroom.
What to bring to hospital	Checklist.
Prehab exercises	Simple strengthening exercises to do before surgery (video).

10.5 Recovery & Rehabilitation

URL	/patient-guide/recovery-after-surgery/
H1	What to Expect After Surgery
Length / type	1,500–2,000 words

Section	Content
Week-by-week recovery	Knee and hip tracks.
Physiotherapy programme	Videos of key exercises.
Pain management	Multimodal pain control in hospital and at home.
Warning signs	When to call immediately.
Daily-life milestones	Stairs, driving, work, travel, prayer/floor-sitting, Indian toilet.

10.6 Cost & Insurance

URL	/robotic-knee-replacement-cost-nashik/
H1	Robotic Knee Replacement Cost in Nashik
Length / type	1,200–1,500 words

Section	Content
What affects the cost	Implant, robotic technology, surgeon, anaesthesia, hospital stay, investigations, physiotherapy, room category.
Insurance & cashless	TPAs/insurers accepted, government schemes if applicable, what may not be covered.
Transparency	No single fixed price online; an accurate estimate after consultation.
CTA	Request an estimate (form).

10.7 Outstation Patients

URL	/patient-guide/outstation-patients/
H1	Joint Replacement in Nashik for Outstation Patients
Length / type	800–1,000 words

Section	Content
Who it's for	Patients from Nashik district, North Maharashtra (Dhule, Jalgaon, Ahilyanagar, etc.) and beyond.
Remote first opinion	Send X-rays on WhatsApp.
Travel & stay	Nearby accommodation, how many days to plan for, follow-up via video.

10.8 FAQs

URL	/faqs/
H1	Frequently Asked Questions
Length / type	40–60 FAQs grouped

Section	Content
Groups	Robotic surgery · Knee replacement · Partial knee · Hip · Arthroscopy · Cost & insurance · Hospital stay · Recovery.
Format	Accordion with search; each answer links to the full article.

SECTION 11

Knowledge Centre

This is the long-term traffic engine: 65+ genuinely useful articles answering the questions patients actually ask in clinic. No AI-generated filler; each article is reviewed by Dr. Kasliwal before publishing.

Category	URL	Target	Purpose
Knee	/knowledge-centre/knee/	30+ articles	Arthritis, replacement, partial knee, recovery, sports injuries
Hip	/knowledge-centre/hip/	15+ articles	Hip arthritis, AVN, replacement, recovery
Robotics	/knowledge-centre/robotics/	20+ articles	Robotic surgery explained, comparisons, cost, myths

Article page template

Element	Detail
URL	/knowledge-centre/[category]/[question-slug]/ e.g. /knowledge-centre/knee/when-can-i-walk-after-knee-replacement/
Top	H1 as the patient's question · author + “Medically reviewed by Dr. Vishal Kasliwal” · last-updated date · reading time
Quick answer box	2–3 sentence direct answer at the top (helps Google snippets and AI search)
Body	800–1,800 words, H2 subheadings, diagrams, short paragraphs; cite guidelines/studies where relevant
Bottom	“When to see a specialist” box → related procedure page → 3 related articles → FAQ → Book CTA
Schema	MedicalWebPage / Article with author and reviewedBy (Physician), BreadcrumbList
Languages	English first; top 15 articles also in Marathi (Phase 2)

Knee: 30 planned articles

#	Article title	#	Article title
1	What is knee osteoarthritis? Causes, stages & symptoms	16	When can I climb stairs after knee replacement?
2	Knee pain after 50: when to see an orthopaedic surgeon	17	When can I drive after knee replacement?
3	Non-surgical treatment for knee arthritis: what actually helps	18	Can I sit cross-legged, squat or kneel after knee replacement?
4	Knee injections explained: steroid, hyaluronic acid & PRP	19	Using an Indian-style toilet after knee replacement
5	When should I consider knee replacement?	20	Returning to work after knee replacement
6	Am I too young (or too old) for knee replacement?	21	Week-by-week physiotherapy after knee replacement
7	What happens during a total knee replacement?	22	Stiffness after knee replacement: causes and solutions
8	Who is suitable for partial knee replacement?	23	Warning signs after knee replacement
9	Partial vs total knee replacement	24	Diabetes, BP and knee replacement: preparing safely
10	Can a partial knee be converted to a total knee later?	25	Bow legs and knock knees in arthritis
11	Both knees at once or one at a time?	26	ACL tear: symptoms and treatment options

#	Article title	#	Article title
12	How long does a knee replacement last?	27	ACL reconstruction recovery and return to sport
13	How painful is knee replacement recovery?	28	Meniscus tear: repair or trim?
14	How long will I stay in hospital after knee replacement?	29	Knee cartilage damage: treatment options
15	When can I walk after knee replacement?	30	Kneecap (patellar) instability explained

Hip: 15 planned articles

#	Article title	#	Article title
1	Is my pain from the hip or the back?	9	Leg length after hip replacement
2	Hip arthritis: symptoms and treatment	10	Hip precautions: avoiding dislocation
3	Avascular necrosis (AVN) of the hip: early signs	11	Sleeping after hip replacement
4	AVN treatment by stage	12	Walking and driving after hip replacement
5	When is hip replacement necessary?	13	Sitting on the floor after hip replacement
6	What happens during total hip replacement?	14	How long does a hip replacement last?
7	Hip fracture in the elderly: why surgery is urgent	15	Why hip replacements fail: revision surgery explained
8	Navigation and robotic-assisted hip replacement explained		

Robotics: 20 planned articles

#	Article title	#	Article title
1	What is robotic knee replacement?	11	Soft-tissue balancing and why it matters
2	Does the robot do the surgery? The surgeon's role	12	Does robotic surgery mean a faster recovery?
3	How VELYS™ robotic knee replacement works	13	Is robotic knee replacement safe? Risks explained
4	Plan, guide, balance, verify: the robotic workflow	14	Do I need a CT scan before robotic knee replacement?
5	Robotic vs conventional knee replacement: what the evidence says	15	Robotic partial knee replacement explained
6	Robotic surgery vs computer navigation: the difference	16	Robotic-assisted hip replacement
7	Is robotic knee replacement worth it?	17	Robotic knee replacement cost in Nashik: what affects it
8	Who is a candidate for robotic knee replacement?	18	Does insurance cover robotic knee replacement?
9	Who may not need robotic surgery?	19	7 myths about robotic joint replacement
10	Personalised (functional) alignment explained	20	Questions to ask your surgeon before robotic knee replacement

Publishing rhythm

Launch with 12–15 cornerstone articles (5 knee, 4 hip, 4 robotics), then 2–3 per week. Each article links to its procedure page; each procedure page links to its 5 most relevant articles.

SECTION 12

Stories, contact & utility pages

12.1 Patient Stories

URL	/patient-stories/
H1	Patient Stories: Back to Doing What You Love
Title tag	Patient Stories | Knee & Hip Replacement Nashik | Kasliwal Joint Institute
Meta description	Real stories from patients treated at Kasliwal Joint Institute for knee replacement, hip replacement and arthroscopy.
Target keywords	knee replacement reviews Nashik, Dr Vishal Kasliwal reviews
Length / type	Gallery page

Page content, in order

#	Section	What it contains
1	Video stories	Marathi/Hindi/English with subtitles; filter by procedure.
2	Written stories	Before/after life (walking, stairs, temple visits, travel), no clinical guarantees.
3	Google reviews feed	Live widget + “Leave us a review” link.
4	CTA	FAQ accordion (with FAQPage schema), then Book / Call / WhatsApp buttons

Consent is mandatory

Get written consent for every name, photo, video and story (in line with India's Digital Personal Data Protection Act, 2023 and medical confidentiality). Never show identifiable medical images without consent.

12.2 Contact & Book Appointment

URL	/contact/ · /book-appointment/
H1	Book a Consultation with Dr. Vishal Kasliwal
Title tag	Book Appointment | Dr. Vishal Kasliwal | Kasliwal Joint Institute, Nashik
Meta description	Book a consultation for knee, hip or shoulder problems at Kasliwal Joint Institute, Gangapur Road, Nashik. Call, WhatsApp or book online.
Target keywords	Dr Vishal Kasliwal appointment, orthopaedic doctor Nashik contact
Length / type	Conversion pages

Page content, in order

#	Section	What it contains
1	Booking form	Name, phone, city, concern (knee/hip/shoulder/second opinion), preferred date, optional X-ray/report upload, consent checkbox.
2	Instant options	Click-to-call, WhatsApp chat, emergency number.
3	NAP block	Exact official name, address, phone, email, OPD timings (identical to Google Business Profile).
4	Map & directions	Embedded Google Map, landmarks, parking.
5	Thank-you page	/thank-you/ with next steps; used for conversion tracking.

12.3 Legal & utility pages

Page	Purpose
Privacy Policy	How form, WhatsApp and analytics data are collected and used (DPDP Act 2023).
Terms of Use	Website terms.
Medical Disclaimer	Content is educational, not a diagnosis; results vary between patients.
HTML Sitemap	All pages for users and crawlers.
404 page	Branded, with search and links to key pages.

SECTION 13

Technical SEO, local SEO & migration

Good content will not rank unless the technical issues found in our research are fixed. This section is the launch checklist.

13.1 Domain decision (the client must choose)

Option	Pros	Cons
A. Recommended: New brand domain (e.g. kasliwaljointinstitute.in / .com) as the single primary site	Matches the rebrand; clean start; easy to remember and share.	Also new, so it needs the redirects below to inherit authority.
B. Keep robotickneeandhip.in as the main site	Keyword in the domain; already live.	Doesn't match the brand name; only 4 months old; robotics-only name limits arthroscopy and trauma content.

Whichever is chosen: **301-redirect** robotickneeandhip.in, drvishalkasliwal.kasliwalhospital.in and the orthopaedic pages of kasliwalhospital.in / .com to the matching new pages, page by page. Keep kasliwalhospital.in only if it serves the wider hospital (paediatrics, gynaecology), linking to the institute site for orthopaedics. Do not leave duplicate content on multiple domains.

13.2 Technical checklist

Area	Requirement
Indexing	Google Search Console + Bing Webmaster verified; robots.txt allows Googlebot; no stray noindex; XML sitemap submitted; check that pages are indexed after launch.
Rendering	Server-rendered or static HTML (e.g. Next.js/Astro or a well-built WordPress theme). Never rely on JavaScript-only rendering for content.
Speed (Core Web Vitals)	LCP under 2.5s, INP under 200ms, CLS under 0.1 on mobile 4G. WebP/AVIF images, lazy loading, no heavy sliders, fonts self-hosted.
Mobile	Mobile-first design, sticky Call/WhatsApp/Book bar, tap targets of 44px or more.
URLs	Short, lowercase, hyphenated, keyword-led (as in the sitemap); one canonical per page; HTTPS; www/non-www consolidated.
On-page	Unique title (under 60 characters) and meta description (under 160) per page; one H1; logical H2/H3; descriptive alt text; internal links using descriptive anchor text.
Schema (JSON-LD)	Physician (Dr. Kasliwal) · MedicalClinic/Hospital (institute + hospital, with address, geo, openingHours) · MedicalProcedure (procedure pages) · MedicalWebPage/Article with reviewedBy · FAQPage · BreadcrumbList · VideoObject.
Analytics	GA4 + Search Console + call/WhatsApp click events + form conversions; monthly ranking report for target keywords.
Security & forms	SSL, spam protection, consent checkbox, secure storage of uploaded reports.
Languages	Phase 2: Marathi versions of the homepage, key procedure pages and top articles, with hreflang (en-IN / mr-IN).

13.3 Local SEO

Priority	Keywords
Primary	robotic knee replacement in Nashik
Secondary	knee replacement surgeon Nashik · robotic knee replacement surgeon Nashik · partial knee replacement Nashik · robotic partial knee replacement Nashik · hip replacement surgeon Nashik · robotic hip replacement Nashik · joint replacement surgeon Nashik · revision knee replacement Nashik
Supporting	knee arthroscopy Nashik · ACL surgery Nashik · AVN hip treatment Nashik · shoulder arthroscopy Nashik · knee replacement cost Nashik

- **Google Business Profile:** profiles for the practitioner (Dr. Vishal Kasliwal) and the facility. Correct categories (Orthopedic surgeon / Hospital), services, photos, weekly posts, Q&A;, and a website link to the new site. The business name must match real-world signage; change it to “Kasliwal Joint Institute” only once the signage changes.
- **NAP clean-up:** update Justdial, Practo, Lybrate, ClinicSpots, HexaHealth, ThreeBestRated, Latrexa, Facebook and others with the same name, address, phone, experience and fee. Remove the old Juna Agra Road address.
- **Reviews:** a polite post-discharge WhatsApp review request with a direct Google review link. Reply to every review; never incentivise reviews.
- **Regional content, not fake location pages:** the Outstation Patients page plus genuine content for Nashik district and North Maharashtra. Do not create dozens of pages that only swap city names.
- **Authority:** local press (robotic surgery milestone), conference talks, GP/physician referral pages, YouTube channel with patient education videos.
- **Entity relationship for Google:** Dr. Vishal Kasliwal → Kasliwal Joint Institute → Kasliwal Super Speciality Hospital → Nashik → Joint Replacement → Robotic Knee / Partial Knee / Hip. Use consistent naming, schema and sameAs links everywhere.

SECTION 14

Compliance & content governance

Rule	How we apply it
Verify every claim	“First and only VELYS™”, years of experience, number of procedures, laminar airflow OT, and robotic use in revision/hip all need written confirmation before going live.
No superlatives or guarantees	No “best”, “No. 1”, “100% success”, “painless” or guaranteed outcomes. Recovery timelines are shown as typical ranges.
Professional-conduct norms	Ask the client to confirm the site's wording with their advisor against current NMC guidance on doctors' public communication.
Medical review	Every procedure page and article is reviewed and approved by Dr. Kasliwal; show “Medically reviewed by” and a last-updated date.
Evidence	Robotic vs conventional comparisons cite published studies and say honestly where evidence is still developing.
Patient consent & privacy	Written consent for testimonials, photos and videos; privacy policy; secure handling of uploaded reports (DPDP Act 2023).
Trademarks	VELYS™ with attribution to DePuy Synthes; no manufacturer logos without permission.
Images	Replace all AI-generated demo imagery with real, consented photography before launch.

SECTION 15

Inputs needed from the client & roadmap

15.1 Content & information checklist

#	Item	Why we need it
1	Official hospital name (exact registered spelling) and how “Kasliwal Joint Institute” relates to it	Schema, Google Business Profile, legal pages
2	Exact address, PIN, landmark, Google Maps link, phone numbers, email, OPD timings	NAP consistency and the contact page
3	Designation wording, e.g. “Consultant Joint Replacement & Arthroscopy Surgeon”	Hero, about page, schema
4	Final verified numbers: years of experience, total procedures, robotic cases to date	Trust bar; fixes directory inconsistencies
5	VELYS™ details: installation date, knee/hip/revision use, and proof for any “first/only” claim	Hero badge and robotic pages
6	Full CV: fellowships with years, preferred spellings, memberships, publications, talks, awards, registration no.	About page and E-E-A-T
7	Domain decision (Option A or B) and access to existing domains, hosting, Search Console and GBP	Migration and redirects
8	Photos: portrait, operating, VELYS™, OT, exterior, interior, physiotherapy, team	Replace demo imagery
9	Consented testimonials (video/text) and the Google review link	Patient Stories and homepage
10	Insurance/TPA list, cashless status, typical length of stay	Cost and Patient Guide pages
11	Logo files (SVG) and brand assets	Design system
12	Top 30 questions patients ask in clinic	Knowledge Centre priority list

15.2 Suggested build order

Homepage → Dr. Vishal Kasliwal → Robotic Knee → Robotic Partial Knee → Robotic Hip → Patient Journey → Hospital → FAQs → Knowledge Centre → SEO & local architecture.

15.3 Phased roadmap (indicative)

Phase	Timing	Deliverables
1. Discovery & inputs	Weeks 1–2	Checklist above, verified fact sheet, domain decision, keyword map, content briefs.
2. Design	Weeks 2–4	Design system from the demo; homepage, inner-page and article templates; mobile designs; client approval.
3. Content & build	Weeks 4–8	~33 core pages written and medically reviewed; development, schema, forms, analytics.
4. Launch & migration	Weeks 8–9	301 redirects, Search Console, sitemap, GBP and directory NAP updates, QA and speed testing.
5. Growth	Ongoing	2–3 Knowledge Centre articles per week, Marathi pages, video, reviews, monthly SEO reporting.
